

Report Builder rebuild

Comprehensive local owner-review evidence

Branch: codex/report-builder-rebuild

Starting commit: 097c997

Fixture data is deterministic, Magnetix-created, and local-only.

This package visually exercises the committed editor surface and its supporting delivery model. It does not use production authentication or production data.

1. Report Designs index

Polished Content Sets-aligned index with celestial header treatment, search, status filtering, fixture rows, Content Set, page count, updated time, and actions.

Element Page

Select an element on the canvas to edit it.

2. Create Report Design

Create flow with design name, Default/custom Content Set, Blank/Template start choice, and US Letter/A4/Custom page size.

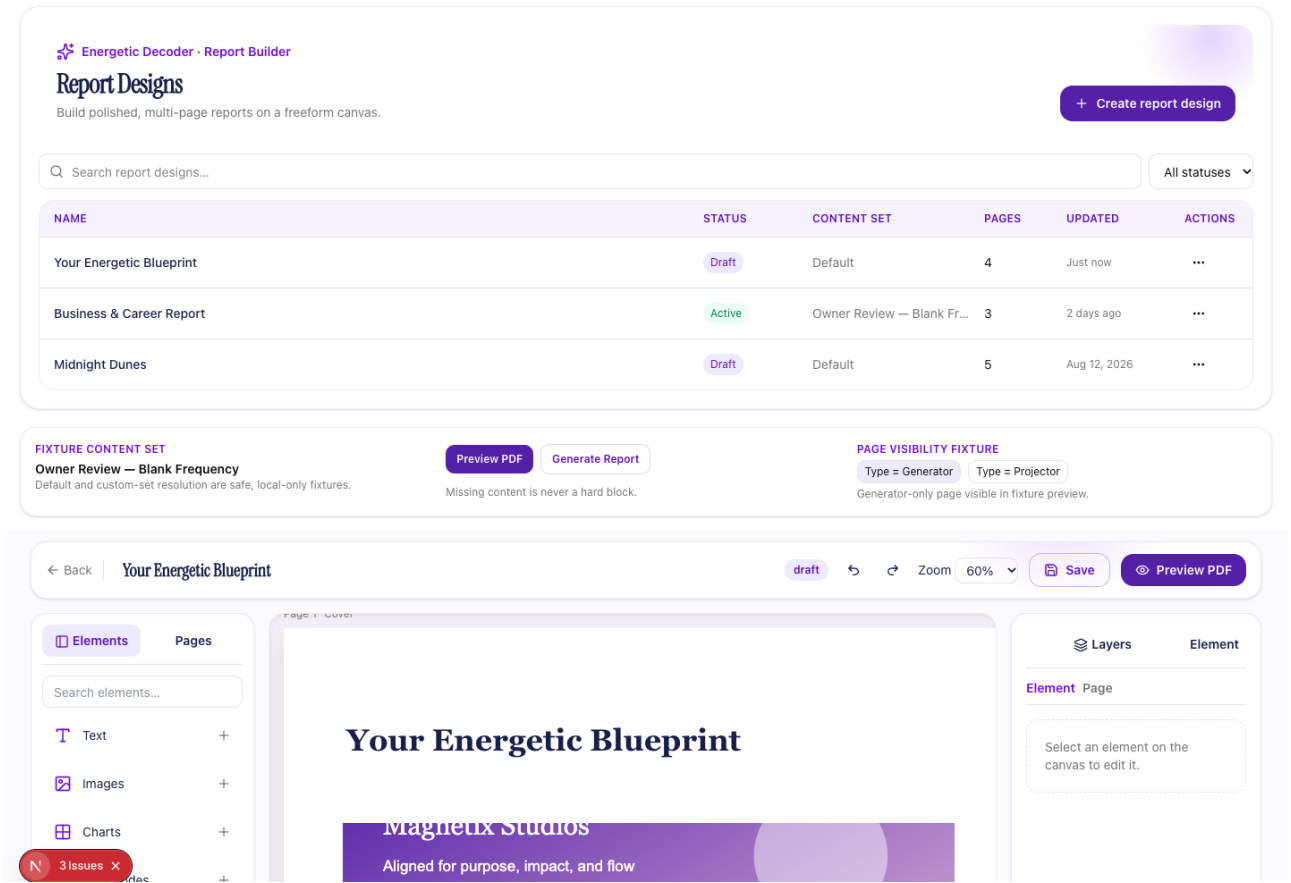

The screenshot shows a 'New Report Design' dialog box with the following fields and options:

- Report Design name:** A text input field containing 'e.g. Energetic Blueprint'.
- Content Set:** A dropdown menu showing 'Default (built-in)'.
- Start from:** Two buttons: 'Blank canvas' (highlighted in purple) with the subtext 'Start with a clean page', and 'Template' with the subtext 'Choose a Magnetix structure'.
- Page size:** A dropdown menu showing 'US Letter'.
- Create & open canvas:** A large purple button at the bottom.

In the bottom left corner of the application window, there is a red notification bubble that says 'N 3 Issues' with a close button.

3. Desktop builder shell

Editable title, draft status, undo/redo, zoom, Save, Preview PDF, Add Elements, template categories, fixed-page canvas, and Layers/Element inspector regions.

4. Text selected + inspector

The selected text element exposes content, font, size, bold, italic, underline, alignment, color, letter spacing, line height, position/size, lock/hide, and delete controls.

The screenshot displays the Magnetix Studios report builder interface. The main canvas shows a report titled "Your Energetic Blueprint" with a purple header and a diagram of a human figure with energy points. The text element "Your Energetic Blueprint" is selected, and its inspector panel is open on the right. The inspector panel includes fields for X, Y, Width, and Height, as well as options for Bold, Italic, Underline, Alignment, Color, Letter spacing, and Line height. A "Delete element" button is at the bottom of the panel.

Color: [Dark Blue], Letter spacing: 0

Line height: 1.4

▼ Position & size

Drag the selected element on canvas. Use the lower-right handle to resize and the top handle to rotate.

Delete element

5. Image selected + real asset

The canvas shows the actual Magnetix-created fixture image. The image inspector exposes Media Library selection, position/size, lock/hide, and delete.

The screenshot displays the Magnetix Studio interface for editing a report titled "Your Energetic Blueprint". The interface is divided into three main sections: a left sidebar, a central canvas, and a right-hand inspector panel.

Left Sidebar: Contains a "Elements" tab with a search bar and a list of element types: Text, Images, Charts, Shortcodes, Shapes, Frames, Graphics, and Uploads. Below this is a "TEMPLATE LIBRARY" section with a list of report sections: Cover, About, Chart, Summary, Type, Strategy, and Authority. At the bottom of the sidebar, there is a red button labeled "3 Issues" with a close icon.

Central Canvas: Shows a preview of the report. At the top, the title "Your Energetic Blueprint" is displayed in a large, bold, black font. Below the title, the text "Magnetix Studios" is visible, followed by the tagline "Aligned for purpose, impact, and flow". The background of the report is a purple gradient with a large, light purple circle. At the bottom of the canvas, there is a diagram of a human figure with a complex network of lines and shapes, representing an energetic blueprint.

Right-Hand Inspector Panel: Contains a "Layers" tab and an "Element" tab. The "Element" tab is active, showing the properties of the selected text element. The properties include: "Text Element", "X" (58), "Y" (76), "Width" (540), and "Height" (100). Below these are "Text" settings: "Your Energetic Blueprint", "Font" (Georgia), "Size" (34), "Bold" (checked), "Italic" (unchecked), "Underline" (unchecked), "left" (selected), "center" (unchecked), "right" (unchecked), "Color" (dark blue), "Letter spacing" (0), and "Line height" (1.4). At the bottom of the panel, there is a "Position & size" section with instructions: "Drag the selected element on canvas. Use the lower-right handle to resize and the top handle to rotate." and a "Delete element" button.

6. Real charts on canvas

The canvas contains actual BodyGraph, Astrology wheel, and Frequency/Hologenetic renderer output. Chart element configuration remains the source of PDF output.

5. Layers and overlap

The populated Layers panel shows real text, chart, image, and shape layers with selected state and z-order controls. Drag, resize, rotate handles are implemented on selected elements.

7. Shortcodes + Content Set

Shortcodes are searchable and categorized across birth details, Human Design, interpretation, Astrology, and Frequency. The harness exposes Default plus a blank custom fixture set and uses the same resolver path.

9. Missing-content warning

Actual fixture warning state: the custom set intentionally lacks Frequency gate 1 giftText. Go back/review and Continue anyway are both available; the warning is non-blocking.

10. Preview flow

After continuing, the fixture preview reports that the missing value remains blank and no Default fallback is inserted.

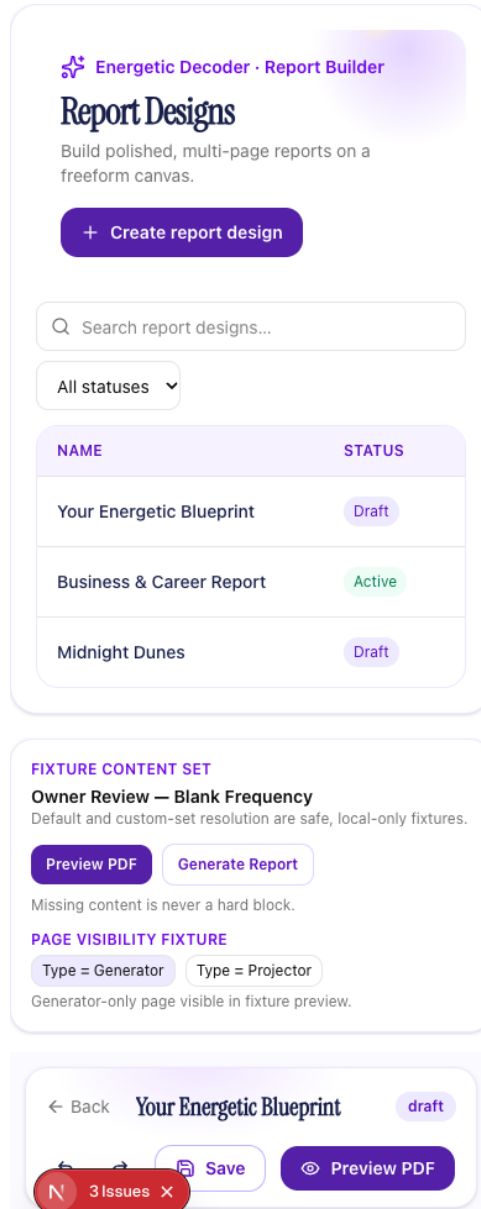

11. Tablet shell

820px responsive evidence: the editor shell, Add Elements, canvas, inspector flow, Save, and Preview PDF remain accessible without page-level horizontal overflow.

12. Phone shell

390px responsive evidence: top controls, sequential canvas, Add Elements, Pages, Layers, and inspector controls are available without page-level horizontal overflow.

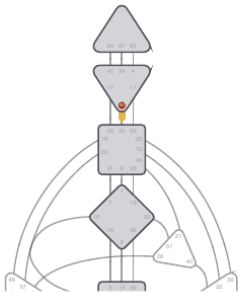

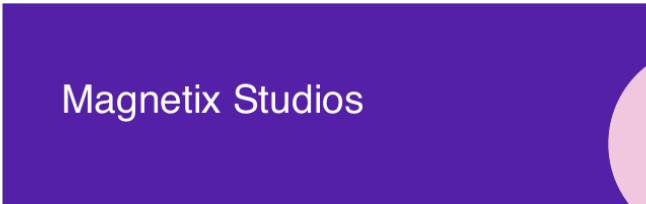

12. Actual rendered report PDF

The separate example PDF is generated through ReportDesignPdfDocument from the same canvas geometry model and contains three Letter pages with a real image, BodyGraph chart, Astrology wheel, Frequency chart, shape, and text.

13. QA summary

TypeScript and the production build are run after the current changes. The existing Content Sets suite remains the regression baseline; additional visual checks use the local fixture harness and Playwright at all requested widths.

Verification	Result
Canvas charts	Real HD, Astrology, Mandala, and Frequency components rendered
Images	Fixture image renders; Media Library picker is wired for replacement
Freeform	Drag, resize handle, rotate control, overlap, z-order, undo/redo paths
Content Sets	Default/custom fixture selector and no-fallback resolver
Warning	Preview and Generate fixture paths are warning-only
Visibility	Generator match/non-match fixture states
Responsive	320, 360, 375, 390, 430, 768, 820, 1024, 1280, 1440 measured without page overflow
Safety	No push, deploy, production writes, migrations, or Build Log update

The screenshot folder and actual rendered report PDF are delivered separately alongside this review PDF.
